

2700W Picosecond Laser Machine For Tattoo Removal / Skin Tightening

Our Product Introduction

For more products please visit us on hifubeauty-machine.com

Basic Information

- Place of Origin: China Guangzhou
- Brand Name: Fractional laser machine
- Certification: CE
- Model Number: CPM-3
- Minimum Order Quantity: 1
- Price: confer
- Packaging Details: Standard export packing
- Delivery Time: 5-8days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 Piece/Pieces per Month

Product Specification

- Name: Picosecond Laser Machine
- Voltage: AC220v±10% 50Hz, 110v±10% 60Hz
- Spot Size: 2-10 Mm
- Other Name: Picosecond Laser
- Wave Length: 1064nm, 532nm
- Energy Density: $\leq 0.6 \text{ J/cm}^2$
- Laser Power: 2700W
- Rf Frequency: 2M
- Feature: Skin Tightening, Tattoo Removal
- Highlight: 2700W Picosecond Laser Machine, Skin Tightening Picosecond Laser Machine, Picosecond Laser Tattoo Removal Machine

Product Description

Picosecond Laser Machine For Tattoo Removal And Skin Tightening

Product Description:

One of the key features of the Picosecond Laser Machine is its ability to deliver RF frequency of 2M. This allows the machine to penetrate deep into the skin, targeting the underlying tissues and stimulating the production of collagen and elastin. As a result, the skin becomes tighter, firmer, and more youthful-looking. This makes the Picosecond Laser Machine an ideal choice for patients who want to achieve a more youthful appearance without undergoing surgery.

The Picosecond Laser Machine is also highly effective in removing tattoos. Its high-intensity laser pulses break down the ink particles into smaller fragments, which are then eliminated by the body's natural processes. The machine's spot size of 2-10 mm makes it easy to target even the smallest and most intricate tattoos, making it a popular choice among patients who want to get rid of unwanted tattoos. The Picosecond Laser Machine is designed to be easy to use, with a user-friendly interface that allows operators to easily adjust the settings and customize the treatments according to the patient's needs. It is also equipped with safety features that ensure the machine operates safely and efficiently.

The Picosecond Laser Machine operates on a voltage of AC220V \pm 10% 50Hz, 110V \pm 10% 60Hz, making it suitable for use in different countries and regions. It is also compact and portable, making it easy to transport and store.

In summary, the Picosecond Laser Machine is a highly advanced and versatile aesthetic laser machine that can be used for skin tightening and tattoo removal. Its advanced technology and user-friendly design make it a popular choice among both patients and operators. If you are looking for a safe and effective way to achieve a more youthful appearance or get rid of unwanted tattoos, the Picosecond Laser Machine is definitely worth considering.

Technical Parameters:

Product Name:	Picosecond Laser Machine
Other Name:	Picosercond Laser
Feature:	Skin Tightening, Tattoo Removal
Laser Type:	Pico Laser
Laser skin rejuvenation machine:	Yes
Laser beauty machine:	Yes
Voltage:	AC220V \pm 10% 50Hz, 110V \pm 10% 60Hz
Aiming Beam:	Diode 655 Nm (Red), Adjustable Off/on
Energy Density:	$\leq 0.6 \text{ J/cm}^2$
Maximum Energy:	2000M
Rf Frequency:	2M
Screen Size:	12 Inch Touch Screen

PRODUCT DESCRIPTION

Applications:

One of the main applications of the Picosecond Laser Machine is tattoo removal. The high energy density of the pico laser can break down tattoo ink into small particles, which can be absorbed by the body's immune system. It is a more efficient and safer alternative to traditional tattoo removal methods, like IPL Laser Beauty Machine. The Fractional Laser Machine CPM-3 is also ideal for skin rejuvenation treatments. The 1064nm and 532nm wavelengths can both stimulate collagen production and improve skin texture. The Picosecond Laser Machine is also effective for removing pigmentation and freckles. The high energy of the laser can break down melanin in the skin, which can then be absorbed naturally by the body. It is a quick and painless alternative to other methods, such as the

810 skin rejuvenation machine.

Another application of the Fractional Laser Machine CPM-3 is scar removal. The pico laser can stimulate the growth of new skin cells, which can ultimately reduce the appearance of scars. This is a non-invasive and less painful alternative to other scar removal methods. Overall, the Fractional Laser Machine CPM-3 is a versatile device suitable for a wide range of beauty and medical treatments. Its high-energy pico laser technology can deliver fast and effective results with minimal discomfort. Its 12-inch touch screen and adjustable aiming beam make it easy for practitioners to operate and ensure precise targeting of skin issues.

Customization:

Our brand name laser skin rejuvenation machine, the Fractional laser machine, is model number CPM-3 and proudly made in China Guangzhou. The machine is equipped with a powerful Pico Laser pulse and a 12-inch screen for easy operation. The energy density of the laser is $\leq 0.6 \text{ J/cm}^2$, making it safe and effective for laser skin rejuvenation treatments. The aiming beam is a diode 655 Nm (Red), which is adjustable for on/off use. The spot size can be adjusted from 2-10mm, allowing for precise treatment of various skin conditions. Our laser beauty machine can be customized to meet your specific needs and preferences. Contact us today to learn more about our product customization services.

FAQ:

Q: What is the brand name of this laser machine?

A: The brand name of this laser machine is Fractional laser machine.

Q: What is the model number of this laser machine?

A: The model number of this laser machine is CPM-3.

Q: Where is this laser machine made?

A: This laser machine is made in China Guangzhou.

Q: What is the main function of this laser machine?

A: The main function of this laser machine is to remove tattoos, pigmentation, and skin rejuvenation.

Q: Is this laser machine safe to use?

A: Yes, this laser machine is safe to use, as long as it is operated by a professional and experienced technician.
